Lab 10: CSS Effects

Submission

Upload to *SCF* by 4:50pm on Thursday, 04/02. Do <u>not</u> modify any files after the deadline.

Overview

For this lab you will apply CSS effects (transitions and animations) to create a photo gallery on a topic of your choice. Initially, some images will overlap but will be revealed once users hover over them. [The last page](#) contains two different examples.

Requirements

1. Create `lab_10` directory on your *SCF* account within `public_html/itp104` directory.

   a. Upload all lab files to `lab_10` directory.

   b. Link the lab on your Student Page

2. Create a parent container (`<div>`) that will hold your images.

3. Add at least three (3) images of your choice to the parent container above.

4. Make images overlap, so most of their content is obscured.

5. When users hover over the parent container:

   a. Reveal the images using `transform` CSS property.

6. Use `transition` CSS property to ensure all effects are gradual.

7. Add some styling to make the page presentable.

8. Be creative and have fun!

Example

Note: examples below do not necessarily guarantee full credit.
